

# Neurological Disorders Presentation

## Overview

Research a neurological disorder and create a five-minute oral presentation about the history of the disorder, how it affects the brain and nervous system, and the treatments that are currently available.

- Visit [Neurological Disorders A-Z](#) page to find topic ideas. List 3-5 topics that interest you:
  - 1.
  - 2.
  - 3.
  - 4.
  - 5.

Due: \_\_\_\_\_

- Write a short paragraph about each of your topic ideas. Why does this disorder interest you? Why is it important? Provide some background information.

Due: \_\_\_\_\_

- Prepare a bibliography using the MLA, APA, or Chicago format. Select at least five scientifically vetted sources (e.g., a text book, related *BrainFacts.org* articles, Google Scholar articles).

Due: \_\_\_\_\_

- Write an outline or detailed notes about your research topic. Create a timeline of the discovery and research of your topic, and write an overview of how the disorder affects the brain. Your presentation should be able to answer the questions, “what are the symptoms?” and “what are the treatments?” Use this when presenting your topic to the class.

Due: \_\_\_\_\_

- Create a visual aid to accompany your presentation. This can be in the form of a poster, PowerPoint, or fliers.

Due: \_\_\_\_\_

- Present your topic and poster/PowerPoint/fliers to the class.

Due: \_\_\_\_\_

Points possible: \_\_\_\_\_
